### **IRB – Castle & Key (1:05:12 YouTube Recording)**

The County Attorney explained that an amended ordinance was submitted after the first reading passed at the May 12, 2026, meeting, adding a provision allowing the issuer to terminate the bonds after 20 years. Because this is a substantive change, he recommended nullifying the prior first reading and conducting a new first reading with the updated language.

Mr. Eifler clarified that the Industrial Revenue Bonds (IRBs) are conduit bonds, meaning the County acts only as issuer and bears no financial responsibility. Repayment comes solely from company lease payments, with no pledge of County credit or taxing authority, and no County liability in the event of default.

Mr. Eifler further explained that the County would hold only “nominal paper title” during the term and would transfer it back to the company at the end for a nominal amount, with the company treated as the economic owner throughout. He noted the County was directed to work with the fire district regarding an estimated \$6,000 annual revenue impact. The County proposed a “hold harmless” approach using a PILOT structure, funded by growing barrel tax revenues (approximately \$22,000 in 2023 increasing to about \$58,000 in 2025), but the fire board rejected the proposal.

Mr. Eifler also explained that a PILOT (Payment in Lieu of Taxes) is used in IRB structures to offset tax abatements and hold taxing districts harmless, particularly school districts affected under Kentucky’s SEEK funding formula. Because increased taxable value can reduce state SEEK funding, the proposal uses a percentage-based PILOT tied to property value, so it automatically adjusts over time and keeps districts financially neutral.

Mr. Eifler stated the estimated immediate local impact of the bonds is about a \$30,000 annual reduction across taxing districts, including roughly \$8,650 to the county, \$6,980 to the fire district, \$7,400 to the library, \$2,900 to the health district, and \$2,300 to the extension district. He contrasted this with approximately \$796,000 in annual revenue currently generated by the company through barrel taxes, occupational taxes, and net profits taxes, with barrel tax revenue growing from about \$320,000 in 2023

to roughly \$726,000 in 2025. Overall, he emphasized that the proposed 20-year abatement is small compared to the company's significant and growing local economic contribution.

Hoppy Henton emphasized the importance of agriculture in Woodford County and its strong "symbiotic" relationship with the distilling industry, noting that local farms supply major crops—especially corn used by distilleries like Castle & Key—supporting both agriculture and the local economy.

The discussion also noted that Castle & Key currently supports about 100 local jobs, with additional anticipated employment including 3–5 jobs from a pizza restaurant and 20–30 future hotel jobs, reflecting phased growth tied to development.

Judge Kay indicated that the first reading vote would be addressed later in the meeting under committee reports.

**FY 2026-2027 Budget Discussion (Continued)**

3. A motion was made by Liles Taylor and seconded by John Gentry to include the allocation of \$250,000.00 in the proposed budget for FY 2026-2027 for Property Development Rights Project.

Jordan,  
Glady to hear that Woodford County and the fiscal court has reviewed and approves the submitted fee proposal. We do not need anything formally signed by the Judge or Woodford County at this time. We just needed some documentation that this have been approved by Woodford County and your below email should suffice.

Once I get something back from KYTC District 7 I can then submit this to KYTC Professional Services. I have highlighted some text from the 3/18 email below that outlines the next steps. Once we get a Supplemental Letter Agreement from KYTC I can then put together a formal contract and sent to Woodford County for signatures and execution.

Judge Kay, Jordan, Holly and Shane,

Now that the Right of Way funds have been authorized and the MOA between KYTC and Woodford County is close to being fully executed we would like to submit the fee proposal package for the Right of Way services.

As previously discussed, we have secured the services of Stand Associates to provide the majority of right of way services for the project. Strand provides a lot of right of way services for KYTC across the state and has provided services for us on many of our LPA contracts.

I have attached a fee proposal package for your review and consideration. Once the packaged is approved by both Woodford County and KYTC, we will submit a full fee proposal package in KYTC format to KYTC Professional Services to receive a Supplemental Letter Agreement. Professional Services will want documentation that both KYTC and Woodford County has concurred with the scope of work and fee proposal so if each could send an email with your concurrence after your review that would be helpful.

Once we receive the Supplemental Letter Agreement, we can then enter into a formal contract with Woodford County for these services.

If anyone has any questions, please feel free to reach out to me at your convenience.

Brian,

I discussed the attached request with Cecil and he informed me that Michael Beaven, with CO ROW will need to review the fee proposal. However, this review traditionally would take place after the ROW scoping meeting. Our process for requesting ROW funds for LPA Projects is quite challenging and complex. Cecil and I have done our best to address the complexities but LPA projects must follow the same standards as a typical SYP project. Michael is copied on this email and he may be able to instruct us further. Thank you again for your patience.

Shane,

Hoping all is well.

Just wanted to follow-up with you to see if you have had a chance to review the fee proposal for the right-of-way services for the Big Sink SW and MUP project? I believe said that you may get with Cecil to look it over.

Do want to note that we had used an estimated Notice to Proceed date of 04/15/26 which we will have to adjust when we send this to Adrian Wells in Professional Services. When we adjust the project beginning and end dates the overall fee changes often changes slightly.

Just a FYI, Woodford County has already reviewed and approved the proposed package (please see attached email

Jordan,  
Glady to hear that Woodford County and the fiscal court has reviewed and approves the submitted fee proposal. We do not need anything formally signed by the Judge or Woodford County at this time. We just needed some documentation that this have been approved by Woodford County and your below email should suffice.

Once I get something back from KYTC District 7 I can then submit this to KYTC Professional Services. I have highlighted some text from the 3/18 email below that outlines the next steps. Once we get a Supplemental Letter Agreement from KYTC I can then put together a formal contract and sent to Woodford County for signatures and execution.

Judge Kay, Jordan, Holly and Shane,

Now that the Right of Way funds have been authorized and the MOA between KYTC and Woodford County is close to being fully executed we would like to submit the fee proposal package for the Right of Way services.

As previously discussed, we have secured the services of Stand Associates to provide the majority of right of way services for the project. Strand provides a lot of right of way services for KYTC across the state and has provided services for us on many of our LPA contracts.

I have attached a fee proposal package for your review and consideration. Once the packaged is approved by both Woodford County and KYTC, we will submit a full fee proposal package in KYTC format to KYTC Professional Services to receive a Supplemental Letter Agreement. Professional Services will want documentation that both KYTC and Woodford County has concurred with the scope of work and fee proposal so if each could send an email with your concurrence after your review that would be helpful.

Once we receive the Supplemental Letter Agreement, we can then enter into a formal contract with Woodford County for these services.

If anyone has any questions, please feel free to reach out to me at your convenience.

Brian,

I discussed the attached request with Cecil and he informed me that Michael Beaven, with CO ROW will need to review the fee proposal. However, this review traditionally would take place after the ROW scoping meeting. Our process for requesting ROW funds for LPA Projects is quite challenging and complex. Cecil and I have done our best to address the complexities but LPA projects must follow the same standards as a typical SYP project. Michael is copied on this email and he may be able to instruct us further. Thank you again for your patience.

Shane,

Hoping all is well.

Just wanted to follow-up with you to see if you have had a chance to review the fee proposal for the right-of-way services for the Big Sink SW and MUP project? I believe said that you may get with Cecil to look it over.

Do want to note that we had used an estimated Notice to Proceed date of 04/15/26 which we will have to adjust when we send this to Adrian Wells in Professional Services. When we adjust the project beginning and end dates the overall fee changes often changes slightly.

Just a FYI, Woodford County has already reviewed and approved the proposed package (please see attached email

Judge Kay, Jordan, Holly and Shane,

Now that the Right of Way funds have been authorized and the MOA between KYTC and Woodford County is close to being fully executed we would like to submit the fee proposal package for the Right of Way services.

As previously discussed, we have secured the services of Stand Associates to provide the majority of right of way services for the project. Strand provides a lot of right of way services for KYTC across the state and has provided services for us on many of our LPA contracts.

I have attached a fee proposal package for your review and consideration. Once the packaged is approved by both Woodford County and KYTC, we will submit a full fee proposal package in KYTC format to KYTC Professional Services to receive a Supplemental Letter Agreement. Professional Services will want documentation that both KYTC and Woodford County has concurred with the scope of work and fee proposal so if each could send an email with your concurrence after your review that would be helpful.

Once we receive the Supplemental Letter Agreement, we can then enter into a formal contract with Woodford County for these services.

If anyone has any questions, please feel free to reach out to me at your convenience.

## COMPREHENSIVE PLAN REVIEW

---

Selected Goals and Objectives from Chapter One of the Woodford County Comprehensive Plan state the following:

**GENERAL PROCESS GOAL:** Ensure that the processes and activities of the Versailles-Midway-Woodford County Planning and Zoning Commission occur in a fair and efficient manner and that the Commission will recognize that property owners have the right to enjoy the lawful use of their property in pursuit of their own best interests, both social and economic, yet recognize also that the ownership of property confers responsibilities. Use of private property should not interfere with the health or safety of neighboring property owners or occupants or deny neighboring property owners those same inherent rights. The Versailles-Midway-Woodford County Planning Commission's Statement of Goals and Objectives serves as a guide for the physical development and economic and social well-being of the community. The Commission creates processes that balance the public and private interests through the implementation of processes that are fair and efficient.

**OBJECTIVES:**

- Encourage citizen input from divergent interests within the community.
- Allow adequate time for concerned citizens to address the Commission within the spectrum of public hearings.

**TRANSPORTATION GOAL:** To provide the citizens of Woodford County with a well-planned and coordinated system of major thoroughfares, neighborhood streets and non-motorized trails that are safe, cost effective, and adequate for their surroundings.

**OBJECTIVES:**

- Promote and encourage projects to minimize through traffic on main streets and narrow residential streets including but not limited to alternate routes.

**GENERAL LAND DEVELOPMENT GOAL:** Provide for the proper organization of land use to ensure: an increasingly safe, healthy and convenient environment for the residents of the County, and; adequate land in appropriate locations for all land uses by utilizing the Land Use Districts (ie: Future Land Use Map) to guide daily decision-making regarding land uses and development proposals in order to minimize the adverse impacts of developments.

**OBJECTIVES:**

- Encourage future land development to be located in centralized compacted patterns and ensure the highest and best possible usage of land by utilizing the Land Use Districts (ie: Future Land Use Map) to guide land uses and development proposals.
- Strive to provide a balance between recreational, tourist, unique natural areas, cultural attractions, and any development that might harm the surrounding physical environment near such attractions.

**NATURAL RESOURCE CONSERVATION GOAL:** To encourage and promote the conservation and protection of Woodford County's natural resources such as agricultural, scenic, cultural, archaeological, geological, and biological sites.

- Support strong functional small communities through planning and land use regulations, designed to encourage the stability of existing rural settlements.

**AGRICULTURAL USE GOAL:** To protect and promote the county's agricultural economy and character.

**OBJECTIVES:**

- To provide sufficient agricultural land so as to protect the County's agricultural economic base and productivity potential.
- Protect agricultural land from urbanization and incompatible land uses in order to provide adequate resources for all agricultural production.
- Conserve the unique elements of the County's agrarian character, such as the horse farms, in order to promote tourism and its related economic benefit.

- Preserve the integrity of the area zoned agricultural in the county by requiring that residential, commercial and industrial development shall only occur in areas appropriately zoned or designated by the Comprehensive Plan.

**TOURISM GOAL:** To promote and support the economic growth of tourism in Woodford County by connecting local tourism-related businesses and activities with customers, vendors, and one another.

**OBJECTIVES:**

- To encourage the increase of Woodford County's share of the Bluegrass area's tourist dollars.
- To encourage the development of tourism-related businesses including but not limited to the bourbon industry, wine production, and the railroad.
- To encourage cooperation among the various local interests that serve as attractions for visitors, i.e. hotels, motels, restaurants, museums, bed and breakfast houses and short term rentals.
- To support and encourage the preservation of historic sites, archaeological sites, unique scenic areas, and horse farms that attract the traveling public.

**Additionally, the Woodford County Comprehensive Plan states the following in Chapter V:**

Chapter Five of the Comprehensive Plan states the following: Area Wide Development Policies. The following development policies apply to all development within the community. They apply equally to development occurring in areas heretofore undeveloped and infill development proposals. These policies are generally applicable across planning areas and are listed separately in this section so that they need not be repeated in the descriptions or criteria and policies applicable specifically to those areas.

Policy #	Area Wide Policy Description
1.	New development and redevelopment within the 100-year floodplain is discouraged. Any necessary development within the 100-year floodplain should incorporate mitigation measures that minimize its impact on the floodplain and protect the development from flood damage.
2.	Areas proposed for development should be assessed for the presence of sinkholes. Where sinkholes are found, development, although not discouraged, should incorporate appropriate measures so as to minimize the impact on ground water and to avoid structural instability.

3.	Development should occur in areas where there is existing infrastructure and public services or where they are easily provided in order to minimize public costs associated with those services.
4.	Reuse and redevelopment of existing parcels and structures, versus development of vacant parcels, is encouraged. Such projects, when involving appropriate uses and densities, should require minimal review.
5.	Except as otherwise provided, the size and scale of all development and redevelopment should reflect and be complimentary to the character and style of surrounding developed areas.
6.	Developers should incorporate where possible and practicable the protection of all natural resources into their development proposals to create unique additions to the community while protecting the natural environment. These natural resources include but are not limited to questionable soil types, wetlands, floodplains and steep slopes.
7.	All areas designated for development are understood to be appropriate for recommended use types and densities at any time assuming infrastructure and required services are available or will be made available. However, development proposals for areas adjacent to previously developed areas are considered to be particularly suitable and as such are encouraged. Such projects, when involving appropriate uses and densities, should require minimal review.
8.	Except in the Small Community areas and approved Rural Residential areas, new development should occur only in areas where sanitary sewers are available from public agencies and can meet the additional demand as determined by those agencies.
9.	New development should occur only where there is adequate public water supply and pressure for fire protection services, the finding of adequacy based on data from and the opinion of the water provider.
10.	Extensions of utility service will be the responsibility of developers with public agency participation possible where utility service extensions are needed and desired to serve larger areas and are appropriate future expansions of the utility.
11.	Access points along major arterials from new developments should be minimized to the extent possible. New developments should be interconnected with existing developed areas and allow for interconnection with adjacent undeveloped areas in order to provide alternative means of ingress and egress as well as to allow efficient means of providing public services.

## COMPREHENSIVE PLAN LAND USE DISTRICTS

**The Rural District.** The Rural District consists of all land outside the Urban Service Areas, Small Community District, Agricultural/Equine Preserve District and Kentucky River Environs District. It contains a diverse set of uses, ranging from rural residential cluster subdivisions to farms to crossroads communities such as Troy. The compatible integration of human activities within the rural setting is the focus of this District, and it is clearly intended that the rural character of these lands be preserved.

Many of these rural areas are undeveloped due to the lack of public services or have other site constraints. These areas provide many important benefits to the landowner and community such as agriculture, water filtration, flood protection, and wildlife habitats. The use of the lands in this rural district should be primarily reserved for agricultural operations, open space, agricultural tourism activities, and limited low-density residential including in-family conveyances in order to support Woodford County's agricultural economy, rural landscape, and rural cultural heritage.

**Rural District - General Development Policies/Guidelines Checklist**

Policy #	General Development Policy/Guideline Description
1.	Agricultural lands and operations should be encouraged by the use of various land use techniques including but not limited to conservation easements and right to farm regulations and limited residential clustering.
2.	Agricultural tourism related land uses should only be permitted as an accessory land use to a principal use that is agricultural related. Lands approved for an agricultural tourism related use should remain in the same ownership as the principal use.
3.	Proposed driveways to State and County roads should be coordinated with the appropriate local and state road departments to maximize site distance while minimizing the impact to the corridor.
4.	Rural residential clusters and small community developments should be designed to minimize the need for cut and fill operations that would significantly alter the natural topography and drainage patterns of the site.
5.	The relationship of dwellings, farm accessory structures, country roads and open space is a primary element defining rural character. When new dwellings and accessory structures associated with rural residential development are proposed, the siting of such structures should be accomplished in a manner that preserves or enhances long views and vistas, complements existing structures, and does not adversely impact existing agricultural operations of adjoining property owners.
6.	Entrances to farms and dwellings from country roads represent opportunities for identification and can be an important rural design element. Farm and rural property owners should be encouraged to use these opportunities for identification in a way that would complement the rural character of Woodford County and add interest to the countryside as viewed from country roads.
7.	On-site sanitary sewer systems associated with eco-tourism activities or rural development should be reviewed by the Health Department to ensure an appropriate placement of the system with regard to steep slope areas, rock outcroppings and potential sinkholes, and groundwater conditions.
8.	Site and building lighting for proposed uses should be reviewed in order to determine that off-site impacts are minimized.

## Rural District - Infrastructure Policies Checklist

Policy #	Infrastructure Policies Description
1.	All development shall be served by a public water provider and should maintain adequate water pressure as specified by applicable water district.
2.	All development shall not incorporate sidewalks.
3.	The Planning Commission should utilize then current level of service (LOS) information for affected thoroughfares to help determine the extent of desired street connectivity between adjoining land uses. Where the LOS is determined to be "D", "E", or "F", the Planning Commission should place a greater emphasis on the need for multiple connections, particularly to alternate thoroughfares. If the proposal creates and or retains a LOS "E" or "F" the Planning Commission and legislative bodies should not approve the proposal. Careful consideration should be given to location of access points given issues with narrow roadways, terrain and farm traffic.
4.	Storm water runoff should be managed using techniques reflecting the state of the art at the time of development with due consideration given to safety in a mixed use primarily residential environment. Storm water runoff should be managed using techniques reflecting the state of the art at the time of development with due consideration given to the environment and farming operations.
5.	Where sanitary sewers are not available, development should occur with onsite sewage disposal systems approved by the appropriate public agency.

Madam Chair called upon Kim O'Reel (staff) for comments. Ms. O'Reel noted that the final record plat was proposing to divide the tract into three single family lots for construction of three single family homes. One lot will front First Street and two lots will front N. Winter Street. Ms. O'Reel noted that this property had recently been in front of the Planning Commission as a zone change. Ms. O'Reel distributed an updated version to the Commission which included a minor 15' sanitary sewer easement. The plat went through TRC with no deficiencies. No further comments.

### PUBLIC HEARING ITEMS

Liftoff Equestrian LLC have filed an application to rezone a property on a tract of land containing 43.419 acres located at 2108 Huntertown Road, Versailles KY. The requested zone change is from Rural Residential (RR) / Residual Farmland (RF) to Agricultural (A-1).

Liftoff Equestrian LLC have filed a Conditional Use Permit Application on a tract of land containing 43.419 acres located at 2108 Huntertown Road, Versailles KY. The Applicant proposes the operation of a Short Term Rental Facility.

Madam Chair opened the public hearing and called upon Mr. Hunter for comments. Mr. Hunter noted that the applicant was applying to rezone the property back to agriculture and also applying for a Conditional Use Permit to operate a Short Term Rental facility. Mr. Hunter noted that they would need the CUP to operate the Short Term Rental if the zone change was successful. Mr. Hunter shared an aerial and the plat on the monitor and noted that the property was 43.419 acres and zoned rural residential and was an active equestrian facility. Mr. Hunter noted that the property was zoned to Rural Residential and Residual Farmland in 1999 containing four lots. It was never developed or platted. Mr. Hunter noted that the applicant was participating in the meeting via Zoom. Mr. Hunter reviewed/summarized the staff report for the zone change. Mr. Hunter reviewed the staff report for the Conditional Use Permit. Mr. Hunter discussed the conditions for the CUP and noted that the Commission could add conditions.

Madam Chair asked the applicant if they would like to speak or if they had someone present on their behalf.

Justin Watts, applicant/owner noted that he didn't have anything to add except going into this he was unaware that the Rural Residential was ineligible for short term rental. He was aware that the property had four lots on it when he purchased the property but had no interest in that; he is not a developer, he is a farmer. Mr. Watts noted that they saw the short term rental as another income revenue because of the proximity to Keeneland for two months out of the year and they have clients that come in and try potential horses for sale or they come in for horse shows. It falls in line with their business plan.

Madam Chair asked if anyone from the public wished to speak. No one from the public spoke.

Ms. Isberg questioned if they would be adding another driveway or using the existing driveway. Mr. Watts noted that they would use the existing driveway and did not have plans to add another one.

Madam Chair closed the public hearing. Madam Chair asked if anyone was prepared to take action on the zone change.
